

Student Mental Health Assessment Report

Student Name: Sara

Date: 28 July 2026 09:27 PM

Assessment Result

Prediction: Low Mental Health Risk

Risk Score: 44%

AI Wellness Recommendations

■ Encouragement

You are doing a commendable job balancing your studies and life. With a solid foundation already in place, making a few gentle adjustments can significantly elevate your daily energy and well-being.

■ Study Advice

Your 5 hours of daily study demonstrate real dedication. Focus on quality over quantity by using the Pomodoro technique (25 minutes of study, 5 minutes of rest) to boost your focus and study satisfaction.

■ Sleep Recommendations

Sleeping less than 5 hours impacts memory and mood. Gradually increase your rest by moving your bedtime up by 30 minutes and keeping screens off right before sleep.

■ Nutrition

Fuel your brain with quick, affordable, nutrient-dense choices. Hydrate well and swap processed snacks for bananas, oatmeal, or peanuts to keep your energy steady throughout the day.

■ Stress Management

Manage academic and financial pressure with brief daily check-ins. Practice 5 minutes of deep breathing every morning, and create a simple weekly budget to feel more in control.

■ Emotional Support

Remember that you don't have to carry stress alone. Lean on trusted friends, student groups, or campus counseling services whenever you need a listening ear.

■ Daily Motivation

Small, consistent actions lead to extraordinary progress. Believe in your potential and take things one day at a time!
