

Student Mental Health Assessment Report

Student Name: Sara

Date: 26 July 2026 03:29 PM

Assessment Result

Prediction: Low Mental Health Risk

Risk Score: 44%

AI Wellness Recommendations

■ Encouragement

You are doing a fantastic job navigating your university years! At 20, you have a solid foundation, and with a few small adjustments, you can unlock even more energy and academic satisfaction.

■ Study Advice

You are already putting in a solid 5 hours daily. To boost your satisfaction and CGPA, try the Pomodoro technique: study for 25 minutes, then take a 5-minute break. This keeps your mind fresh and learning active.

■ Sleep Recommendations

Sleeping less than 5 hours is holding you back. Aim for 7 hours of rest by setting a strict digital curfew—turn off screens 30 minutes before bed to help your brain wind down.

■ Nutrition

Fuel your brain better! Swap out processed snacks for affordable, energy-boosting foods like bananas, oats, eggs, and nuts. Staying hydrated will also instantly improve your focus.

■ Stress Management

To ease academic and budget worries, dedicate 5 minutes a day to deep breathing. Check out free student budgeting apps to gain control over your finances and reduce anxiety.

■ Emotional Support

Remember, you don't have to carry your stress alone. Share your experiences with friends or campus student services—talking it out is a sign of strength.

■ Daily Motivation

"Step by step, day by day, small changes lead to big achievements." You've got this!
